PARTNER AND COURSE INFORMATION

The Python Pioneers course is one of the professional training components provided in the wider Work4All program. It was designed by Phoenix Space and delivered by Associazione Lumo in Milan, Italy between May and November, 2023.

The Work4All program facilitates the entry/re-entry into the labor market for migrants/immigrants in Italy through vocational and professional training programs.

*Students withdrew from the course for various reasons, including conflicting time commitments due to full-time work or university obligations, personal/family issues (including being stranded in home country), or serious health concerns.

Course details

Course Duration

The course was split into 2 levels...

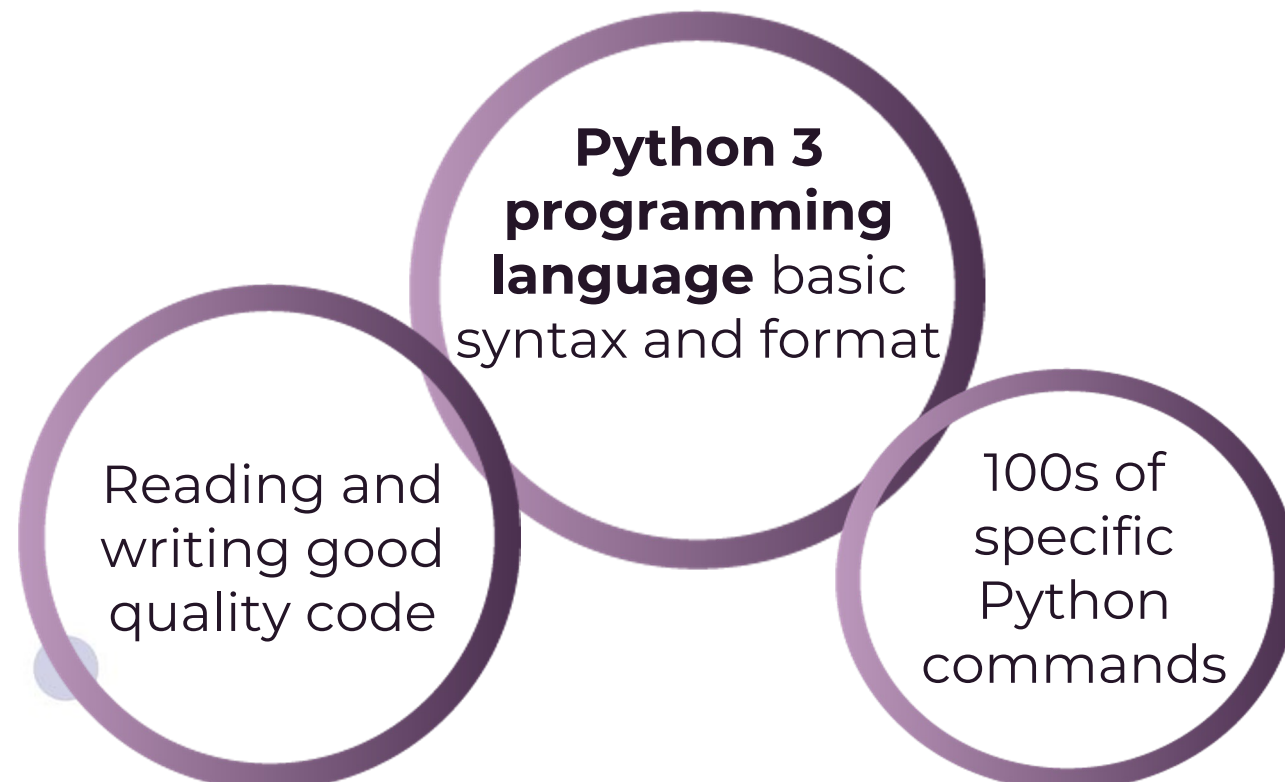

Beginner: Lessons 1-8. This level covers fundamental concepts, starting with basic Python syntax and progressing through essential programming constructs like control flow, lists, loops, functions, and string manipulation.

Advanced: Lessons 9-14. Building upon the fundamentals gained in the beginner level, we introduce more sophisticated topics such as advanced string manipulation, modules, dictionaries, files and the introduction of classes. This level aims to enhance the ability to write more complex and modular code.

How do you believe the course has benefited your future?

“

My medium to long term goal is to work in data analysis. Python is widely used in this industry and I hope it can help me.

”

Mattia, M,
45, Italian

“

I hope learning Python will make it easier to learn Java. I wish to go into data science and develop models.

”

Kevin, M, 28,
Kenyan

“

It will allow me to search for a new job and work in technology some day.

”

Mayra,
F, 33,
Peruvian

“

The Python Pioneers course will strengthen my CV.

How did you find the difficulty of the content of the course? (5 = very easy)*

How interesting did you find the course to be? (5 = very interesting)

How did you find the pace of the course? (5 = very fast)

How was it for you to take the course in English? (5 = very easy)

*Students found the exercises were most difficult, noting that they were too long. They also noted that some of the lessons required a baseline knowledge that they were not prepared for. Some videos included thorough explanations while others did not. Additional learning outside of the course was required by some.

88%

Of students would recommend Python Pioneers to a friend

Feedback from the Course Tutor

Stefania
Quattrocchi
Course Tutor

“

This course was interesting and, at the same time demanding. It was necessary to make continuous adjustments to the teaching plan and to closely follow each participant with continuous reinforcement.

The participants have achieved a background in programming, which is a good basis for continuing their professional development. For some of them, the next step will be the Java/ Javascript course, also in the context of the [Work4All] project.
