

Vision: A world where every young person, regardless of circumstance, has access to the tools, knowledge, and confidence to shape their future and build resilient, innovative communities.

Mission: Empowering underserved children and youth to become self-reliant, creative, and adaptable agents of change in their communities through transformative STEM education, digital upskilling, and lifelong learning opportunities.

Global Reach

What Our Students Say

“I asked what ‘Phoenix’ meant; it was not a common name, and I didn’t know what it meant. When I listened to its story, I found similarities with my own situation. We have been going through difficult times, and I can look to the future more optimistically with what the project offers me.”
Laila, 16, F, Turkey

96%
Believed they could figure out anything if they tried hard enough, after participating in Phoenix Space programmes.

95%
Now have a greater interest in science and motivation to pursue STEM education.
